

## Broward Odyssey Home Access Tips

- ❖ Address/url: <http://compasslearningodyssey.broward.k12.fl.us>
- ❖ Be certain **not** to type a “www” or a “.com” anywhere in the address. If you receive a message that the “page cannot be found”, check the address to see if your browser did an auto-add for these items to your address. If so, edit as necessary.
- ❖ Setting up your workstation:
  - Before logging in, select System Requirements from the login screen
  - Verify that your computer meets the minimum requirements listed
  - Select Check System from the next screen and it will determine if the plugins needed are downloaded
  - If a red x appears after the system check, follow the link to download that particular plug in
- ❖ Use the same username and password as used at your school. (Teachers and students login with their same usernames and passwords as they would at their schools.)
- ❖ Leave the “School” field at the default, **ODYSSEY**
- ❖ The Odyssey teacher access and the student portfolio utilize pop-up windows, so you may want to disable your pop-up blocker or familiarize yourself with your browser’s method of allowing pop-ups from this site (either temporarily or always allow).
